T. A. BONSER, at THE NEW GARAGE.

Stony Plain Town Council.

Stony Plain Town Council held its regular monthly meeting on Thursday, with all the members in attendance.

A number of accounts were passed and ordered paid; three bills were held up—one for $60 from the Veterinarian who tested the local cows for TB; this bill was referred to Board of Health; the other two bills were in connection with building the refreshment booth at the Fair Grounds.

Applications were received from four soft-drink vendors, to have their licenses ratified.

That hardy monthly, The Concrete Watertank, was on the bill, and created some discussion. Tenders for the erection of this tank, which had been called for July 5th, and postponed, are again being called for, to be in the Secretary's office today.

An application having been received from a prospective purchaser of Lot 4 Block 2, the Council decided to sell this piece for $500, including the new pavement. This property is on Main street, next the Royal Hotel.

Fall Fires.

In view of the prevailing dry weather, the Fire Warden has issued special instructions regarding fire prevention, in the country. Those who recall the damage done last fall in the district south of town, thru the careless setting out of a fire, should be warned at this present time of the risk taken. It is promised that those proven guilty of setting out fires will be severely dealt with.

S. P. Fair Declared Off.

A good attendance was present Monday night, in the Town Hall, at the meeting of the Directors of the Stony Plain Agricultural Society, when the question of proceeding with the arrangements for the 1922 Fair was up for consideration.

The entries for the Fair closed at 9 p.m. that evening, and at that hour the total was away short of the number for the 1921 Fair.

Taking this fact into consideration, the Directors decided it would be in the best interests of the Society to abandon the Fair for this season.

In 1919 the number of entries were over 2200; in 1920 some 1500; in 1921, 1600. On Monday evening, the total showed about six hundred entries for the 1922 Fair.

On Tuesday morning quite a few farmers came to town to enter their exhibits, and were surprised to hear of the decision of the directors.

The Saturday Matinee.

On Saturday afternoon last, while the Juvenile Branch of the Ancient Order of Cow-Chasers were having a procession to the Town Pound, they were met by several kindly-disposed ladies who "persuaded" the boys to desist from driving the cows, and, afterwards, the cattle were chased out of town. The ladies' action gave rise to a large-sized open-air discussion, and several good arguments were advanced by each side. The hearing continued until the audience dispersed for dinner.

LOCAL NEWS.

J Shearer and A Graden motored up from Ryley on Sunday.

John Koscherofsky and Miss Koescherofsky motored to Leduc on Sunday.

Mr. G. E. Clarke, manager of the Bank of Commerce, and Mrs. Clarke and family have returned from a vacation spent at Ponoka.

N. E. Shorten, Chiropractor, of Edmonton, was in Stony Saturday afternoon, attending his patients.

Mr Ingram made a business trip to Styal on Monday.

Mr. and Mrs. J. S. Weichel of Elmira, Ont., who have been visiting with their son Charles at Calgary, arrived in Stony and are visiting with Hy Opperthauser Sr. for a few weeks.

C. S. Kirby and H. Eastman, Ryley, were visiting friends here on Sunday.

Mr. Brummet arrived last week from Okanagan B.C., and expects to locate if a suitable place be found. Mr. Brummet is father to Mrs Williams, of the Popular Restaurant.

Mr P Falkner is spending his vacation at his mother's home at Sicamous, B. C.

Mr. and Mrs. A. J. Shaul and family motored to Edmonton on Friday.

Ashmead Brothers, have left for Runnymede, Sask., to engage in farm work.

The Sunday 4.27 train from Prince Rupert was 10 hours late.

Mr. O. Opperthauser has under construction a fine stable at his premises on 2d St.

Mrs. L. Meakings wishes to inform the Public, that she has taken over Mr. Freifeld's Ice Cream Parlour. Anyone wishing to hold small parties, etc, can rent room for afternoons or evenings as desired.

Owing to the absence from town of the President, no meeting of U.F. local was held on Saturday night.

Mr Ducholke made a quick disposal this week of his car of binder twine.

Inga Councillors held their regular meeting, on Friday, with a good attendance of ratepayers, who were interested in the payment of accounts for the work recently done on the roads.

Stony Plain foot ball team had a very good practice game on Friday evening last, with a team from the town to the east. Want of practice was shown in the play of some members of the local team, but no doubt this will be righted when the big game comes off. Another good practise was held Monday night.

Kelly's new Emporium on Main St. is rapidly nearing completion as a large gang of men have been working on it the past week. This building is on the site of the Old Royal Hotel, which was burned some 10 years ago, and will greatly improve the appearance of this block.

The Short Work Day

Many things which are fine in theory, and in support of which seemingly incontrovertible arguments can be advanced, do not come up to expectations nor prove a success when the acid test of actual experience is applied. All right in theory, they are failures in practice.

Since the war, and in the topsy-turvy period which has been one of the aftermaths of the great struggle, quite a number of ideas over which people theorized have been given a trial. Russia has gone the limit in socialistic experiments, confiscating property, placing a ban on capital, and generally attempting to run the country on plans never before attempted, but which had for years been lauded and advocated by certain theorists. The world knows the result—Russia ruined, an outlaw among the nations, her people starving by the hundreds of thousands, her lands untilled to a great extent, and her great industries idle and useless.

In other countries, including Great Britain, United States, Canada and Germany, the experiment of greatly reducing the daily number of hours of work is being tried out with, as yet, no appreciable results of a beneficial character resulting to the workers, while the effect on industry and commerce generally, and on the living costs of all people has been disastrous.

Germany probably reveals the best example of the results of this experiment. Under the old autocratic form of monarchial Government, the workers of Germany had to work long hours. Following the revolution and the abdication of the Kaiser, a Workers' Government came into power. Hours of labor were greatly reduced, the old nine and ten-hour days being replaced by an enforced eight-hour day for all occupations, and to seven and six hours for certain arduous occupations. The experiment has not been a success, and, although Germany still has a Workers' Government, it is now proposed to add one or two hours to the workday. This policy is not one being forced on the workers; it is the labor leaders themselves woh see the necessity for the longer workday.

The theory back of the much shortened workday is that the free time thus provided for the worker is to go into the family life, recreation, study—in short, to enable the workman and his family to cultivate qualities valuable to the family, society and the coming generation, to improve health and generally enable the worker to devote more attention to his home and self-improvement. Germany, however, is learning by experience that shortening of the workday below a certain figure develops into a problem of disposition of the free time.

It is pointed out by a writer in The Saturday Evening Post that when a twelve-hour workday is shortened to ten hours the disposition of the two hours does not constitute a problem, but when this free time is extended from two hours to four or even six hours a day a civic and economic problem arises. It has been found that this free time is devoted to a marked extent to one form or another of waste. The waste, it is pointed out, is often economic, in that the free time is devoted to trivialities that reduce the family income for necessities. In a word, the fact is that the free time has, with many, not been devoted to social, cultural, or economic ends, nor even to recreation, but has been worse than wasted, resulting not in an improvement of the condition and health of the worker, but in all round loss to him and his family.

German labor leaders are awakening to the fact that their old theory that with a shorter workday, the output per hour would be increased is not working out in actual practice; that the physical condition and morale of the worker has not improved; and that the only way to increase production and thereby enable Germany to pay her debts and rehabilitate her industries, is to increase the workday. They realize that the present salvation and future hope of Germany depend upon increased production, and that this can only be achieved by longer hours of labor.

Germany does not stand alone in the need for increased production. The whole world suffers from the same need, and particularly industrially developed nations like Great Britain, the United States and Canada. If the shorter workday had resulted in the physical and intellectual improvement of the worker and his family, then the gain would have offset the loss in production, but when there is no gain in that direction, but only loss to add to loss, it is becoming increasingly evident that the extreme short workday is a mistake economically, both for the nation and the individual.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

BAYER Genuine

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

French Deserter Was Foolhardy

Arrested on Swiss Frontier After Defying Police for Years

A wealthy Frenchman, F. Bertrand, described as a deserter, has been arrested at Geneva at a moment when he had practically one foot on either side of the Swiss and French frontier line, in a cafe that straddles the border. The cafe is in the village of Saint Julien on the international boundary. Part of the building is in Switzerland and part in France.

Early in the war Bertrand settled in Geneva where, his accusers aver, he made a large fortune trading with Germany. He bought a villa and several automobiles, and led a life of pleasure. He said he was more French than German, and took pleasure in speaking against France, particularly in the cafe at Saint Julien where, safe on Swiss territory in one of the drinking rooms, he could be overheard and even seen by the French police in the rooms on the French side.

There the French listened to his annoying talk but, unable to catch him on the French side, they could not arrest him. Bertrand boasted that—when there was no police about—he would enter France and return without a passport.

Bertrand, after dining well, crossed the border by going from the room on the Swiss side to greet some friends. At the instant he passed the line into France he was pounced upon by two French gendarmes. He put up a fight, but was quickly subdued, handcuffed and carried away.

Strained Muscles, Sprains, Can Be Treated Quickly

In minor sprains, the muscle is strained a little and all that is needed is a vigorous rubbing with Nerviline. This draws the extra blood away—and permits the muscle to return to its normal condition. The supremacy Nerviline enjoys is owing to its penetrating power, it strikes deeply, that is why it relieves deep-seated pains, and fixes up folks that have Rheumatism, Lumbago, Neuralgia and Sciatica. There is about five times the pain destroying power in Nerviline than you find in the average liniment. Sold everywhere, 35c per bottle.

Figures on the birth-rate in sixteen of the French Departments for the first quarter of the year show that the deaths exceed the births.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentry, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during hot weather as is Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Speed of Fingers Differs

Right Hand Quicker and More Accurate Than Left

The fingers of your right hand are quicker and more accurate than your left, says the Popular Science Monthly.

The ring finger on your left hand shows a burst of speed whenever it can work with the forefingers of your right hand; and it slows down noticeably when it must team with the middle finger of your left hand.

Two fingers working together are faster than one going it alone. And a combination of two fingers on opposite hands is faster than two fingers on the same hand.

Practice, while it increases the speed of all fingers, tends to increase the rate of the slow ones more than the fast ones, thus overcoming the handicap of that one that lags naturally.

Minard's Liniment Relieves Neuralgia

Mlle. Jeanne Lamar, France's champion boxer, stopped her male opponent in a three-round bout held in Reading, Pa., recently.

C17

Employing Good Methods In Poultry Raising Produces Greater Returns

Eleven thousand five hundred and seventy-nine birds are being trapped in Canada this year on poultry breeders own plants. These birds are striving to lay at least one hundred and fifty (150) eggs each—and if possible two hundred and twenty-five (225) eggs or more—in fifty-two (52) consecutive weeks, and so win for their owners Record of Performance Certificates covering in detail their performance for this year.

These 11,579 hens represent only a very small proportion of the total number of hens in Canada but they are the best birds chosen from the flocks of those engaged in pedigree breeding and it is from such stocks that our laying strains must come. Canada has some 34,340,474 head of poultry and from these our production is approximately 206,000,000 eggs. The majority of these birds are just "bred," and by this we mean the mere setting of so many eggs each year with no knowledge or desire for knowledge of the parent stock and only a very vague idea of the flock average. It really amounts to the rearing of a certain number of chicks to replace a certain number of birds marketed each year. Such is the breeding or lack of breeding of the majority of the thirty-four million odd hens in Canada.

The breeding of the birds entered in the Record of Performance is very different and it is their story we wish to tell. In the laying season 1920-21 there were 7,511 birds entered in Record of Performance and we find these entered by poultry specialists, farmer producers, public institutions, and those who might be termed hobbyists. It is well to look in detail into the results obtained by these breeders because it is to them we must look for our pedigree breeding. Perhaps it might be well to describe each of these four classes. Under the heading poultry specialists is included those men who are in the business commercially. The farmer producers are those who make farming their chief occupation and keep poultry as a side line. The hobbyists are of very varied occupations, but these people find something both profitable and interesting in poultry keeping. Under public institutions are included agricultural colleges and schools, experiment stations, public homes, etc.

The following table shows the number of breeders in each of these classes, the birds they entered, the number they withdrew, the number that died, the number that qualified for certificates and the production of the birds qualifying.

	No.	Birds	With-drawn	Died	Qual. Birds	R.O.P. Cert. Prod	Qual. Birds	R.O.P. Adv. Prod.
Poultry Specialists	20	2,798	1,293	163	908	167,398	126	30,130
Farmers	12	453	148	65	101	17,691	8	1,884
Hobbyists	27	835	231	112	275	50,740	47	11,448
Public Institutions	7	2,453	871	290	658	119,107	106	25,561
Totals	66	6,539	2,543	630	1,942	354,936	287	69,021

It will be seen from the above table that of the 6,539 birds entered completing their record year (972 birds of the original entry of 7,511 were withdrawn), 2,229 qualified, or 35.6 per cent. In following this further we find that the poultry specialists had 36.9 per cent. qualify, the farmers 24 per cent., the hobbyists 28.5 per cent., and the public institutions 31.1 per cent. In connection with these figures it is possibly fairer to consider those withdrawn and in this connection we find poultry specialists withdrew 46.2 per cent., the farmers 32.6 per cent., the hobbyists 27.6 per cent., and the public institutions 35.5 per cent. Thus we find that the hobbyists withdrew fewer birds and had a larger percentage of the original entry qualify. Further in working out the average production of the qualified birds we find that those birds qualifying for certificates averaged as follows: Poultry specialists 184.3, farmers 176.1, hobbyists 184.5, and public institutions 181 eggs, and for those birds qualifying for advanced certificates the averages were as follows, poultry specialists 329.1, farmers 325.5, hobbyists 343.5, public institutions 341.1 eggs. These figures represent the entries from all over Canada.

The question is asked who are these hobbyists and why should their average production and their percentage of birds qualifying be higher than the other classes? Included in the twenty-seven hobbyists, whose figures have been considered in the first table we find a medical doctor, a dentist, a banker, a clergyman, a member of parliament, an advertising agent, a university professor, a civil servant, a spinster, a gentleman of leisure, etc. These people have in some cases the means, which enable them to enjoy a hobby, and in others the time necessary to follow the hobby and make it a further source of income. In any case, however, there must be a natural love for the hen and a vision full of productive possibilities. They are all pedigree breeding, which is the essential point and in large measure it is to such breeders that we must look for our pedigree poultry. They keep poultry in the majority of instances in much smaller numbers than it is possible for those included in any of the other three classes, but numbers do not necessarily count in this important work. The crying demand at the present time in connection with our poultry industry is for economic production that can only be secured through the wider distribution of heavy laying strains of pure-bred poultry and the more breeders we have with small flocks taking up this pedigree work the greater the extent of country covered and the greater the influence upon the balance of our poultry keepers.

The poultry specialist is to be encouraged but he will look after himself as the business is his living. The farmer-poultryman must be encouraged to increase his flock, and to change from the usual haphazard method of breeding mongrels to the breeding of pure-bred stock from good laying strains. The farmers has not the necessary time to do the pedigreeing but if the necessary educational work is done and the pedigree stock is available he will soon see the wisdom of taking advantage of the breeding work that has already been done. Our public institutions such as our agricultural colleges are doing a very necessary and useful work along poultry breeding lines and this work serves the additional purpose of interesting students—other than those actually following poultry courses—in the possibilities and importance of the industry.

What we seem to need then is more poultry hobbyists who can be interested in pedigree breeding work. We believe that they have a real place in our poultry life in Canada and that their work will be of real and lasting benefit to the industry. The medical doctor will find problems of disease and digestion that will interest him apart from the actual breeding; the dentist will not find teeth to care for but will find use for the practise of the cleanliness he advocates; the banker will be better able to judge as to the soundness of the business offered him by poultrymen and our co-operative poultry marketing associations; the clergyman will be given credit for the truthfulness of his records and will be a powerful factor in poultry work in his community; the member of parliament will be able to do a little towards seeing that in the rush of national business the poultry industry is not neglected; the advertising agent will receive new inspiration with every cackle of the hen and crow of the cock; the university professor will forget the lecture room and appreciate the contact with nature through the handling of his poultry; the civil servant will find in poultry keeping the means of augmenting his income; the spinster something that will provide an outlet for pent-up love and energy; and the gentleman of leisure an occupation, which every able-bodied man should have.

Outdoor Swimming

The Beneficial Effects of Bathing and Sunlight

"Baths of water are good, baths of air are better, baths of light are best," goes a French saying, but the fact is that the best of all bathing is outdoor swimming, where all three health-giving factors—water, air and light—are combined. Added to these, of course, is exercise, the pleasant, health-giving exercise of swimming.

Dr. C. W. Saleeby, one of the most famous of British physicians, says: "There is clear proof that, whether for the well or the ill, no indoor bathing establishments, however elaborate, nor any artificial light baths, however expensive, have the same value for the human body as its natural environment out of doors."

There are at least two "diseases of darkness"—tuberculosis and rickets. Occasional exposure of the body to sunlight and fresh air is the best preventive of tuberculosis; in fact, the experience of the Qu'Appelle Sanatorium demonstrates beyond doubt that sun baths actually cure stubborn cases of the disease, already advanced to a virulent stage.

Outdoor bathing, especially for children and young people, during the summer months, is encouraged to the fullest possible extent, not only for the purpose of giving the youngsters a good time, but as an effective preventive of the great white plague. Taking into consideration the economic loss caused by such a disease as tuberculosis, the investment in outdoor swimming pools is justified ten times over.

While rickets is a disease of fairly rare occurrence in Western Canada, compared to the darkened slum districts of European cities, it is interesting to note that occasional exposure to sunlight is an effective preventive of this disease also. Experiments with the young of wild animals confined in menageries show that in the presence of light, even lack of exercise will not produce experimental rickets.

It is clearly recognized, of course, that sudden and prolonged exposure to bright sunlight will produce painful and dangerous effects, but the acquirement of a good coat of tan during the summer is about the best investment in health insurance that anyone can make.—Regina Post.

Of 243,135 horses and mules with the American forces during the war, 68,882 perished.

Tells How To Produce A Reasonable Crop From Stubble Land

Population and Food

Capacity of Food Producer Continues to Multiply

Every once in a while some "thinker" assumed that the population of the world doubles every so often—say, fifty years—and then proceeds to calculate that in the year 3922 there won't be standing room.

The latest of these is Herbert Magoun of Cambridge, Mass., who thinks we would all have starved to death long ago if it had not been for war and pestilence. The first enunciator of the theory was Rev. Thomas Malthus, after whom it was named the Malthusian theory. Yet, while the population of the world may have doubled in the past hundred years, the capacity of the food producer has been multiplied twenty or thirty times. A smaller proportion of people are engaged in food production than ever before. And after all the land is under cultivation, we can start farming the sea. Acre for acre, the ocean will produce three times as much food as land.

Of course, the world cannot progress unless conditions make for the multiplication of intelligent people. Only intelligent people can solve the problems which arise from density of population and intensive agriculture. —Regina Post.

Transit of Venus

First Observation Made 153 Years Ago in Philadelphia

The first observation of the transit of Venus by American astronomers was made 153 years ago from a temporary observatory fitted up in the State House yard in Philadelphia. This successful observation, which practically marked the beginning of scientific astronomy in the New World, was in charge of the American Philosophical Society, an organization founded by Benjamin Franklin in 1743, and the parent body of the hundreds of scientific associations in the United States and Canada.

The transit of Venus over the sun's disk was first observed by Horrocks in England in 1639. In recent years American astronomers have engaged in elaborate observations, notably of the transit of Venus in 1882, when the American photographic methods were used with great success.

One of the biggest problems confronting the grain growing farmers in the dry-farming sections of the prairie provinces is how to handle stubble land so that it will produce a reasonable crop in the succeeding year. Fall ploughing has fallen into disrepute in many districts and the farmers will not plough land in the fall unless the soil is quite moist. It has been found impossible to spring plough all stubble land, consequently "stubbling-in" has been extensively practised. There has been a remarkable spreading of weeds and to such an extent that farmers are now seriously considering methods of fall treatment so as to do away, to some extent, with "stubbling-in."

In fall treatment of stubble land the farmer has two options, he may either plough the land or he may surface work it with the disc or cultivator. Fall ploughing has several advantages over fall cultivating; the stubble is buried, the weed plants destroyed, and in addition the seed bed can be made ready for the crop the following year. On the other hand the cost of cultivating is usually less and if there are numerous weed seeds in the surface soil timely and proper cultivating may mean that many of the weed seeds will germinate and be destroyed by the fall frosts, whereas if they are buried to a depth of several inches they may not grow until ploughed up again some succeeding season.

Where weeds are not a factor it will often be found advisable to leave the surface cultivation of stubble land until spring, providing the soil works up readily when moist and the farmer has sufficient time and force to handle the work in the spring. The experiments on the chocolate clay soil at Scott go to show that where the stubble is destroyed in the fall either by burning, discing, or ploughing, the crop yields are decreased the following year as compared with where the treatment is given in the spring, but, as has been previously pointed out, the amount of work possible in the spring is limited.

Some rather remarkable results have been secured on the Scott Experimental Station from discing or burning stubble in the fall immediately before ploughing. These experiments have been under way for several years and with scarcely an exception greatly increased yields have been obtained every year from this additional treatment. For instance, yields of wheat and barley on fall ploughed land have been increased on an average about three bushels per acre and oats six bushels by discing the stubble immediately before ploughing. Burning the stubble before ploughing in the autumn has resulted in increased yields of three bushels of wheat, seven bushels of barley and ten bushels of oats over where the stubble was turned down in the ordinary way. The land on which this experiment was carried out is a chocolate clay soil and comparatively free from weeds, consequently the increase in yield can only be attributed to a firmer seed bed that did not dry out too rapidly.

It is generaly recognized that the earlier that ploughing is done the more likelihood of securing a good crop the following year. In the more humid sections the practice has been to plough as deeply as possible. This has been followed by a number of farmers in the drier districts but they have found that when they turned over the dry soil to a good depth in the fall the soil did not pack down well and as a result poor yields were obtained. The general practice on the fields on the station during recent years has been to plough as shallow as possible in the fall just barely sufficient to bury the stubble so that it did not give trouble. The land is then worked down as rapidly as possible into seed bed condition immediately after ploughing.—M. J. Tisdale, Superintendent, Dominion Experimental Station, Scott, Sask.

Do You Know a Sunfish When You See It?

THE Sunfish is a member of the Globefish family and Pimzie learned this after his wonderful play and rest among the rocks that had been uncovered by the low tide . . . when he learned all about everything concerning Hermit Crabs. What a good time he had had! He hated the mere thought of leaving the place, and yet he had to, because at last the tide was coming in—which, as you know, it does every twelve hours just as it goes out again after the same lapse of time. So, tide coming in and Pimzie perforce going out, he naturally was on the lookout for new things to learn about. He had watched Hermit Crabs until he really was tired, and that is unusual for any Brownie. He had seen them fight about nothing (which they are always more than anxious and willing to do), and he had seen them battle about the homes they lived in, had lived in or were wanting to live in. Such fights! He had seen some of them terribly wounded and torn in half, while the victors triumphantly took possession of the empty shell; and he had seen other things, too! And one of them reminded him of once when he had been on Fifth Avenue, in New York City, and when looking in a shop window had beheld a Japanese screen that had been so beautifully painted and landscaped that for a moment as he gazed at it he almost thought himself beyond the city limits and far away near the ocean. In any case, he wished himself there, and thought of fields and birds and flowers and waters and fish and reeds.

Can you guess what he saw?

He was leaning against some rocks overlooking a patch of water which the sun directly struck, and right there, where he could so distinctly see them, a whole school of Sunfish were lazily basking and swimming in the sun-warmed waters. They all went around and around, none of them hurrying and one of them lagging behind the others; and Pimzie, who in spite of being full of mischief is just as full of love of the unusual and beautiful, could hardly breathe; he was far too busy looking! It was almost exactly like the design on the beautiful Japanese screen that he remembered.

Copyright, 1922.

When thinking of Sunfish we are very apt to make mistakes. We order Sunfish from the fish dealers when we should say Panfish. A real Sunfish is almost round in shape and has two long and pointed hand-like fins toward the end of its body. Right, and for this reason is often called Headfish and Moonfish. It is not very good to eat, and the Panfish that we wrongfully call Sunfish are delicious and much in demand.

It gleams and shines with phosphorus by night.

No Doubt About the Gun

Martin.—If you refuse to marry me I'll blow out my brains.

Martin.—Perhaps you think that I haven't a pistol?

Mabel.—Oh, no doubt, you have a pistol.

DIET NOT EVERYTHING IN KEEPING HEALTHY

Your table may be loaded with food digestible and wholesome, yet you don't get strong. What's the trouble? The liver is lazy, stomach is overloaded, the bowels are not active. Relief is quickly supplied by Dr. Hamilton's Pills. They make weak, sickly people strong and well because they keep the system clear of impurities. Those who regulate the system with Dr. Hamilton's Pills don't have indigestion or constipated headaches, they feel enlived all over, because their system is kept in smooth running order. To revitalize and stimulate your whole being, to shake off lethargy and tiredness, nothing compares with Dr. Hamilton's Pills, which certainly bring good looks, good spirits, good health, 25c all dealers, or The Catarrhozone Co., Montreal.

MY CANADA

XI.

Winnipeg,
July 5th, 19—

Mr. Brown called just as I was competing my last entry. And he has been here almost every day since!!!

At first I was a trifle uneasy, for I was not at all sure that he would know how to act—one never can tell what these unconventional Canadians are going to do. But he is really very good and kind, and his unconventionality is not of the embarrassing sort. He usually comes laden with magazines and chocolates, and twice he has called with a motor-car and taken Mary and me for a spin around the city.

Next week a party of us are going to visit the Agricultural College. A friend of Mary's who is attending the Normal School will be there. Each teacher is required to take a month's course in Agriculture and Domestic Science before she is granted her certificate. I should prefer to see the college when the regular classes are in session, but even this Teachers' Course will be interesting, I am sure, and I shall at least see the buildings and grounds. Mr. Brown is to be of the party, so the live-stock is sure to be properly introduced.

And in ten days I again leave Winnipeg. I am almost excited, and no wonder, for my destination is the Bingham ranch! Is it luck, or fate, or Providence, I wonder?

Sunny, bless her heart, opened the subject.

"Mother," she said one day after an unusually long silence, "why can't Miss Eliot come home with us?"

"Miss Eliot would not care to go so far away from her friends, dear," Mrs. Bingham replied. "Perhaps she and Mary can come out next summer, and we'll have a house-party for them and give them a really good time. It would be too quiet and lonely for her at the ranch now."

Then she turned to me. "I am dreading the winter, myself," she said. "My husband and Sunny and I always take a house in Carbon City for the winter months, but this year my doctor wants me to stay at the ranch and live outside as much as possible. I have not been very well, and he does not think that I shall get enough fresh air and sunshine in the town."

"You should try to find a companion," suggested Mrs. Arnold.

"I did think of sending to England for Jack's sister," Mrs. Bingham continued, "but I know she would simply die of homesickness. Then I thought of advertising for someone, but I don't care to be shut up for six months with a professional companion. So I have no plans made as yet."

"Mrs. Bingham," I began excitedly, "could I . . . would you let me . . . oh, I'd just love to go to Alberta if you'll only have me!"

"And I'd let you ride my very own horse," broke in Sunny, "and we could play we were Indians, and I know David would love you. Please let her come, Mother," she coaxed.

"I could wish for nothing better," said Mrs. Bingham; "but hadn't you other plans?"

Then I told her what had been the object of my visit to Canada, and how that object had changed in part, and finally it was decided that I should go home with her—to stay as long as we were both satisfied.

I went down to the Hudson's Bay Stores early the next morning and was measured for a riding-habit.

I think I shall like Mrs. Bingham very much indeed. She is a Canadian, a Winnipegger, and is not more than thirty. Mr. Bingham—who is coming down to go home with us—is English, ten years older than his wife, and also very nice—Mary is my authority.

The ranch is twenty miles from Carbon City, and Carbon City is a hundred miles from Nowhere, and there are no neighbours nearer than ten miles! But this seeming disadvantage is quite overbalanced by the fact that the mountains are visible—who would care for neighbours under such circumstances?

Sunny chattered unceasingly since it was settled that I should go with them, until now I feel that I know everyone on the ranch, from Lee, the Chinese cook, to William, the goat.

There is an Indian Reserve just across the river from the house, so I shall have an opportunity to study "the only genuine Canadians."

Oh! I almost forgot a very important bit of news. Mr. Hartford was in the city one day last week and he called on Mrs. Arnold. I suppose Mrs. Fiske gave him the address.

And that reminds me that I have had a long letter from Gypsy. She tells me that they all miss me—and that Jeannie has "set up a young man" already. I was slow.

XII.

Winnipeg,
July 19th, 19—.

It is a good thing that I have my diary to confide in, for I am awfully worried. I would give anything I possess to talk with Father for an hour, and as it is I do not feel free even to write to him about my trouble.

To come to the point at once, I have received a proposal from Jerry Brown of Brownsville! It is now quite evident that in this matter, as well as in many others, Mary was right and I was wrong.

The catastrophe occurred after our visit to the Agricultural College. When we had inspected everything of interest there, we all went out to Assiniboine Park and had tea at the pavilion. Afterwards the party broke up into groups of two or three, and I found myself strolling down a woodland path—quite classical setting—with Mr. Brown.

"Rather a neat signboard, that," he remarked, pointing towards a notice just before us.

I followed the direction of his finger, and read this warning, which in large letters flaunted itself in the faces of the unsuspecting public:

"LOVERS' LANE
No Heavy Traffic Allowed"

"I wonder what the limit is?" I asked. "Nine stone for the women and eleven for the men would be a fair one, I think."

"Let me see," Mr. Brown calculated, "that would be a hundred and twenty-six and a hundred and fifty-four pounds, wouldn't it? Why don't you English people drop those pesky stones and do your weighing in an up-to-date style?"

"That is just how I feel about your Canadian money," I retorted.

He smiled as one will smile at a child. "If you'd just mention your objections to the folks at Ottawa, I'm sure they'd see what they could do for you" he answered.

If there is anything that makes me perfectly wild it is to be spoken to in that way!

"I suppose you'll not go quite nine stone?" he continued.

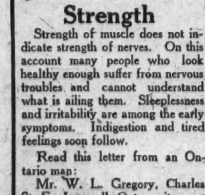
"No!" I snapped; "if I did I'd begin to starve myself."

"And I'm a little more than eleven," he went on mildly, "so we should strike a pretty fair average."

What was the man coming to? I soon found out.

"This park is pretty enough in its way, but it looks pretty small to me after being used to Saskatchewan," he said. "I've got the dinkiest little lake on my place, about a hundred yards from the house, that would make that there toy one look like a cupful of water to a thirsty ox."

(To be continued)



Strength

Strength of muscle does not indicate strength of nerves. On this account many people who look healthy enough suffer from nervous troubles and cannot understand what is ailing them. Sleeplessness and irritability are among the early symptoms. Indigestion and tired feelings soon follow.

Read this letter from an Ontario man:

Mr. W. L. Gregory, Charles St. E., Ingersoll, Ont., writes:

"I had been troubled for quite a while with indigestion. At times there would be a twitching of the nerves of my stomach; and I also found it difficult to get a good night's sleep. I am a moulder, and owing to the nature of my work my system became run-down. I took a treatment of Dr. Chase's Nerve Food, and found great benefit from this medicine. They did me a great deal of good. I have not been bothered at all with indigestion since, and can sleep much better. I have recommended Dr. Chase's Nerve Food to many of my friends, as I think it splendid for anyone run-down and needing a tonic."

What the Glass Contained

Counsel's perseverance is not always successful in eliciting the desired answer. "Was there anything in the glass?" asked the counsel of a somewhat reluctance witness. "Well, there was something in it," he replied. "Ah! I thought we should get at it in time," observed counsel. "Now, my good fellow, tell us what that something was?" The good fellow took time to think over it; at last he drawled out: "It were a spoon!"

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of an injurious nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferers whose vitality has become impaired by the attacks of these internal pests.

The civilized people of the world use on an average, over three million matches every minute.

Another Thing

The benevolent man espied a little tot weeping, and said to her: "Now be a good little boy and stop crying."

The child replied, "I can't."

"Well, here's a penny. Tell me why you can't be a good boy?"

"'Cause I'm a girl."

It Testifies for Itself.—Dr. Thomas' Eclectric Oil needs no testimonial of its power other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, well know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

A Bad Location

Two Jews met on a street in a western town. Said one: "I am all broke up; business is rotten, and I have lost all my money." "How so?" said the friend. "I see your sign still out on the second story of 19 Main Street." "Listen," said the first Jew; "I put in $5,000 worth of fixtures, $10,000 new stock, and insured for $20,000. Then the fire-engine company takes the lower floor and a swimming teacher the floor above me. Oi! Oi!

A Flying Cabinet Minister

The first cabinet minister in Canada to utilize aircraft in the discharge of his official duties is Hon. Mr. Patullo, Minister of Lands of British Columbia, who left recently on a seaplane trip, visiting many points on Vancouver Island and the mainland coast. British Columbia now uses seaplanes as an essential part of its forest protection system, thereby economizing greatly the travelling time of its chief officers.

The publisher of the best Farmer's paper in the Maritime Provinces in writing to us states:

"I would say that I do not know of a medicine that has stood the test of time like Minard's Liniment. It has been an unfailing remedy in our household ever since I can remember and has outlived dozens of would-be competitors and imitators."

King George's Birthday Honors list included five new Peers, fifteen Baronets, and forty-two knights.

Maybe that hill is not there, after all—

VERY often the hill we seem to be climbing, after the middle years, is made out of the common mistakes of diet which starve tissues and nerves and slow down energies with faulty nutrition and stored up food poisons.

How smooth and level the path seemed to be when we were young.

Simple, natural food may level that hill to a smooth path again.

Suppose you try it!

Begin today with a dish of Grape-Nuts with cream or milk (fresh or preserved fruit, too, if you like) for breakfast or lunch. Keep up this crisp, delicious, strengthening food in place of heavy, ill-assorted, starchy breakfasts and lunches—and see if the old-time zest and speed on the old-time level path doesn't come back again.

Grape-Nuts—THE BODY BUILDER

"There's a Reason"

Appointing Officials For Operation Of The New Wheat Board

Ottawa.—James Stewart and F. W. Riddell, who were the chief executive officers on the Canada Wheat Board in 1919, have been asked to take the offices of chairman and vice-chairman on the new board which is being established under the legislation passed by the Dominion Parliament and by the Legislatures of Saskatchewan and Alberta.

The selection of Messrs. Stewart and Riddell was made by the Governments of Alberta and Saskatchewan, and the nomination was accepted by the Dominion Government. If these two men accept the task, their appointments will be made at once and they will be asked to come to Ottawa to make arrangements for the organization of the board.

The Dominion Government, it is said, feels that as the western provinces have the financial responsibility under the law, they should have the choice of the men to take charge. The appointment of the other officials will be postponed pending the receipt of an answer from Messrs. Stewart and Riddell, and their advice will be sought on that matter.

If these two find themselves unable to accept the task of managing the wheat board, it is understood that the Dominion Government will request Saskatchewan and Alberta to make other nominations.

The province of Manitoba has not yet taken action in regard to the wheat board, as the new government is not yet in the saddle. It is said here that provision will be made in the organization of the new board for the addition of directors to represent Manitoba, should that province desire to come in later.

Great West Bank To Quit Business

Sufficient Capital Not Subscribed to Secure Necessary Certificate

Winnipeg.—Announcement is made in an advertisement published here and signed by J. K. McInnis, of Regina, provisional president that the promoters of the Great West Bank of Canada have decided to wind up the affairs of the proposed bank and return money received from subscribers "less the reasonable expenses allowed by law." It is stated that sufficient capital was not subscribed to enable the promoters to secure from the treasury board the necessary certificate which would allow them to commence business.

Northcliffe Critically Ill

London.—Prayers for the recovery of Lord Northcliffe are being offered daily in the church at Barnet, at the request of Lord Northcliffe's mother, who lives near the little town in Hertfordshire.

The clergyman, in inviting the congregation to pray, said it was useless to disguise the fact that Lord Northcliffe was very dangerously ill.

British Aviator Reaches Ambala

Ambala, India.—Major W. T. Blake, the British aviator who is attempting to circle the globe by aeroplane, arrived here Aug. 2, having flown from Lahore. The weather in Northern India is very unfavorable for flying owing to monsoons.

Proven Value

When you take PE-RU-NA for Indigestion, Disordered Stomach, Nervousness, or a general run-down condition of the system, you are doing what hundreds of thousands of people have done before you. Be sure to get PE-RU-NA. It is half a century old, and has won an honoured place in homes throughout the length and breadth of the North American continent as the ideal tonic and blood purifier.

It has proved its value; its prompt use has been of many a serious illness; and today, it is more widely used than ever before because it is the reliable remedy for everyday ills. Sold everywhere, because it is known, and has called for everywhere.

PE-RU-NA COMPANY
344 St. Paul St., Montreal

Appoint Fuel Committee

Have Supervision Over Supply of Coal For Canada

Ottawa.—The Dominion Government has appointed a central advisory fuel committee to have general supervision over the supply of coal and other fuel throughout Canada. The committee consists of Hon. W. C. Kennedy, Minister of Railways; C. A. Magrath and Fred McCort, of Montreal.

Premier Drury, of Ontario, has been in conference with Premier King and Hon. Mr. Kennedy on the fuel situation. The Ontario Premier, it is understood, is arranging for cooperation between his Government and the central advisory fuel committee.

The function of this central committee is regarded in Government circles as being consultative and supervisory. It is desired by the Government that the initiative in the supply of coal and other fuel should be taken by the provinces and municipalities and that the situation should be dealt with as far as possible through the ordinary channels of trade. If advice or information is desired by any of these other bodies the federal committee will be ready to step in; but there is no wish to exercise any control or to supplant the ordinary methods of supply.

"DR. FOWLER'S" Saved The Lives Of Four Children

Diarrhoea, dysentery, cholera, infantum and summer complaint are responsible for more deaths, especially among children, during the summer months than any other form of disease. According to statistics, in the City of Toronto alone, in the past five years out of 1,008 deaths of children, from diarrhoea, 767 died during the four summer months. It therefore behooves every mother to look after her children on the first sign of any looseness of the bowels by using Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 77 years, and has been proven to be the best there is.

Mrs. Harold Sellers, Pennfield, N.B., writes:—"Dr. Fowler's Extract of Wild Strawberry saved the lives of four of my children when all other remedies failed. It stopped the vomiting and terrible diarrhoea with which they were troubled. I will always recommend it, and now always have a bottle on hand in case of emergency."

Price, 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

B.C. Salmon Pack Lowest In Years

Report Shows Decline in Catch in Every District

Victoria, B.C.—Although British Columbia still leads all the other provinces of Canada in fisheries production, the 1921 salmon pack was less than 50 per cent. of the average for the past ten years. The report of Hon. Wm. Sloan, Commissioner of Fisheries, for last year shows that the total pack in 1921 was 603,545 cases, as against 1,187,616 cases in 1920; 1,393,156 cases in 1919, and 1,626,768 cases in 1917. The catch in every district shows a decline.

Meets Claims of Shipping Board

London.—The Government announced in the House of Commons that an agreement had been entered into with the United States Shipping Board for the settlement of certain outstanding claims with the British Ministry of Shipping by the payment to the United States Board of $12,000,000 including interest.

Denies Authorized Sale of Vodka

London.—The Russian trade delegation stated it had been authorized to say that the recent reports from Moscow to the effect that the Soviet Government was preparing to authorize the sale of vodka as a "pure invention."

Killed By Blood Poison

Used an old razor for paring his corns. Foolish because 25c buys a bottle of Putnam's Painless Corn Extractor which for fifty years has been removing corns and warts without pain. No failure if you use "Putnam's." Refuse a substitute, 25c everywhere.

Bottomley Expelled From Parliament

Vote Taken After Reading Letter From Former Editor

London.—Horatio Bottomley, former editor of John Bull, has been expelled from the House of Commons by a vote of the members. After the speaker had read a long letter from him that he was neither guilty nor conscious of fraud, and stating that he had been made "the victim of appalling errors of justice," the vote was taken.

Bottomley's letter said he was unable to leave the hospital and expressed deep sorrow at having brought a slur on the House, which he loved. Continuing, he wrote that if the truth were known he thought the House, in its generosity, would grant him, not only its forgiveness, but its sympathy.

The reading of the letter was heard in dead silence.

China Wants Permanent Constitution

Pekin.—Parliament and President Li Yuan-Hung are in complete agreement over the adoption of a permanent constitution for China similar to that of the United States, the cabinet announced. The right of each province to maintain its own assembly is to be recognized. This, it is believed, will comply with the demands of the southern provinces for provincial autonomy.

It pays to patronize home industry. Buy from the merchants in your own town.

REMARKABLE LETTER

Canadian Woman Recommends Lydia E. Pinkham's Vegetable Compound

Winnipeg, Manitoba.—"I can not speak too highly of what Lydia E. Pinkham's Vegetable Compound has done for me. I was a nervous wreck and I just had to force myself to do my work. Life was a misery and work was a burden. Even the sound of my own children playing made me feel as if I must scream if they did not get away from me. I could not even speak right to my husband. The doctor said that he could do nothing for me owing to my condition, but told me to expect another miscarriage. My husband's grandmother advised me to take Lydia E. Pinkham's Vegetable Compound. I started it right away and everyone noticed what a different woman I was in a short time. I went and engaged my doctor and he did not know me, I was so well. I was able to do my work once more and it was a pleasure, not a burden. Now I have a 'fine bouncing baby' to use the doctor's own words. I am able to nurse her and enjoy doing my work. I can not help recommending such a medicine, and anyone seeing me before I took it and seeing me now, can see what it does for me. What it has done for me it can do for anyone in the same condition. I am only too pleased for you to use my testimonial."—Mrs. EMILY DAVIS, 721 McGee St., Winnipeg, Manitoba.

Endeavor To Solve Delicate Problem Of International War Debts

Inventor of Telephone Dies

Premier King Sent Message of Sympathy to Mrs. Bell

Ottawa.—Right Honorable Mackenzie King, Premier of Canada, sent the following message to the widow of Dr. Alexandra Graham Bell, the noted inventor, who died at his home in Nova Scotia.

"Mrs. Alexandra Graham Bell:

"My colleagues in the Government join with me in expressing to you our sense of the world's loss in the death of your distinguished husband. It will ever be a source of pride to our country that the great invention with which his name is associated is a part of its history. On behalf of the citizens of Canada, may I extend to you an expression of our combined gratitude and sympathy."

(Signed) "W. L. Mackenzie King."

May Spend Winter At Point Barrow

Amundsen Has Discharged Aviator Who Sailed With Him

Nome.—If Captain Roald Amundsen finds it necessary to postpone his trans-Polar flight, as foreshadowed in a message received here, he and Lieut. Oskar Omdal, who transferred from the exploration ship Maud to the schooner Holmes, will winter at Point Barrow, it is said here. Lieut. E. G. Fullerton, Canadian aviator, has been discharged from the services of Amundsen, which is taken here to confirm the report that Amundsen will not attempt before next summer to fly across the pole.

DISTRESS IN THE THROAT CAUSED GREAT ANXIETY

Not an uncommon experience, was that of Mrs. H. S. Wilmot, of Shulee, N.S.: "Many remedies failed, still splendid results were found in 'Catarrhozone.' I have been a most dreadful sufferer from Bronchial trouble and Catarrh. On damp days I would hawk and suffer great distress in my throat. I used all kinds of medicines but didn't get permanent relief till I used Catarrhozone. It strengthened my throat, stopped my cough, and made me well." Try Catarrhozone yourself—see what wonders it works on a bad throat, or colds, catarrh, bronchitis. Different from the old way, because you breathe Catarrhozone. Get the dollar outfit which includes the inhaler and last two months. Small size 50c. Dealers, The Catarrhozone Co., Montreal.

Famous Racers Perish in Fire

Lightning Struck Stables at Connecticut Valley Stock Farm

Hatfield, Mass.—Three famous racing stallions were burned to death when the Connecticut Valley Stock Farm was struck by lightning and totally destroyed.

The stable was valued at $50,000 and, in addition to this, about $40,000 worth of race horses locked in were burned to death. It was impossible to check up on all the horses, as many of them ran wild after they had been liberated. Among those burned were Peter Vonnia, a 7-year-old stallion by Peter the Great, valued at $15,000; the Earl of Chatham and Nelson Todd. Both of the latter were valued at $5,000.

Passengers Perish In Train Wreck

Riga.—Two hundred passengers perished when a five-car train was burned between Kiev and Schepetowka, says a report from Kiev. Included among the victims were eight Zionist pioneers, who were proceeding to join their group on the way to Palestine.

League Council Meets August 30

Paris.—The next meeting of the Council of the League of Nations has been definitely fixed for August 30 to Sept. 4, it was announced today. The sessions will be presided over by Dr. Quinones de Leon, of Spain.

Australia Approves Pacts

Melbourne.—The House of Representatives has ratified the treaties entered into at the recent Washington conference.

London.—The British Government's note to Great Britain's allies in the Great War, reminding them that they owe Great Britain money and that she has a right to ask for payment, has thrown wide open the most delicate topic in international politics. The discussion of the question of debts owed to Great Britain had been studiously avoided by all concerned, apparently with a view on the part of the creditor nation that the time for grasping that nettle might most conveniently be indefinitely postponed.

The most cheerful view of the effect of the Earl of Balfour's note was that it will afford an understanding all round discussed of what are the policies and intentions of the governments concerned. It is considered that, next to repudiation, or an equivalent plea of inability to pay, uncertainty is probably the worst damage which Europe and the world of business could continue to suffer.

Within a few days—after this week's conference between Premiers Lloyd George and Poincare—the policies of both Great Britain and France should be made clear. The French position in one vital respect already is plain—that all European post-war indebtedness is linked together, and that any solution of the situation must depend upon what Germany may be willing or forced to do.

It is understood from the Paris correspondents of the London newspapers that France considers that any concessions to Germany in the matter of reparations and in help by a foreign loan should be balanced by similar concessions to France. Newspaper opinion is divided on the point whether Mr. Lloyd George's conference with M. Poincare will now be confined to a plan for dealing with Germany, or whether Lord Balfour's note will not force consideration of the wider field of inter-allied debts.

There is much curiosity among the public as to what important members of the cabinet were responsible for the strong line Lord Balfour's note takes, since it is believed there is considerable difference of opinion in the cabinet. Also there is curiosity as to how far the advice of Sir Auckland Geddes, British ambassador to the United States contributed to the framing of the note.

Canada's Forest Fires

Three Thousand Have Occurred This Years, Says Report

Ottawa.—Three thousand forest fires have already occurred in Canada this year, according to a pamphlet issued by the Canadian Forestry Association. British Columbia had about 1,400 of these fire and with Central Quebec has passed through the worst fire experience of many years. Airplanes and seaplanes are being used to great advantage in reducing this forest loss and have done excellent work in fighting the British Columbia and Quebec bush fires, transporting fire fighting pumps within one hour where travel by land and water formerly took 15 hours to two days.

Golden Spike Notes.

August Meredith, of Golden Spike, and Mr Hein motored to Hay Lake on Sunday, and enjoyed the trip very much. Crops are looking good in that district.

A little girl has arrived at Mr and Mrs V M Hennig's home. Mother and daughter both doing well.

August Meredith of Golden Spike is planning on taking a trip east, to look for a better cattle market.

Some of the farmers here have started cutting their wheat.

D. T. DAVIS,

FRESH AND SALTED MEATS.
TOP PRICES PAID FOR FARM PRODUCE.
AGENT for ENTERPRISE DAIRY
FAT CALVES AND POULTRY WANTED.

STONY PLAIN,

ALBERTA.

Inga Items.

Harvesting has commenced in this district, and will be general in a week. The hay crop around here is about all in.

A large number of local natives attended the big dance Friday night at Meisner's.

The Trio Birthday Party and Picnic of Mrs J W Bowser and Messrs A H Schincke and P Faulks of Duffield, on Sunday last, at Edmonton Beach, was a grand success, this district being well represented at the festivities. The hosts and hostess entertained and treated in great style. Everybody went home happy.

Mr and Mrs E Pitzler motored on a week-end trip to Legal.

Mr W M Washburn, M.L.A., returned home from the special session last week.

Miss E Kuhl, from Ontario, is visiting with her brother in this district.

Mrs B G Powell and family are back from the Beach.

Mr Oscar Mickelson made a hurried trip to the City this week, and reports her in excellent shape.

Mr C Mills has been ripping up the old familiar landscape at Inga Corner. We think that accounts for all the smoke. Oh, boys, ain't she dry!

Miss Ida Jamison, of the City, is home for a visit.

And now they're getting ready that old belt that wouldn't stay on last fall. Oh, and won't there be some fun this fall!

In the Legislature.

The Special Session of the Legislature, called to consider the supplementary legislation for the establishment of a wheat board closed its session last week. The wheat board bill provides for power to be given the wheat board, appointed under Dominion legislation, to control the purchase, shipment and sale of all Alberta wheat. Similar legislation has already been passed by the Saskatchewan Assembly. The indemnity for the session has been fixed by bill at $200. It is the intention to call the regular session some time in November and adjourn it over Christmas to January.

Hay Supply.

The department of agriculture has commenced investigations respecting the supply of hay to be had in the northern districts. The provincial departmental requested the minister of the interior to withdraw all permits for cutting hay except for actual settlers for their own use, until such time as a thorough survey of the hay situation has been made. This was immediately agreed to. Several thousand tons of hay have been located. Settlers who desire to put up hay for their own use may secure information as to this hay by communicating with the department of agriculture, Edmonton.

DELCO-LIGHT
"Electricity for every Farm"
John H Miller, Agent.
Stony Plain Garage.

Stony Plain Consolidated.

Stony Plain Cons. Promotions List June 1922.

Following is the list of promotions in the Stony Plain Cons. School for the school year 1922. All names appear in order of merit.

To Grade 5
Honors
Teresa Goerz
Geo. Miller
Anna Meyer
Edw. Dannhauer
Helen Ulmer
Walter Miller
Ruth Whight
Clara Hennig
Passed
Clara Kulak
Betzie Dale
Peter Hennig
Lydia Schutz
John Miller
Christina Miller
Mary Kulak
Dorothy Gilbert
Dora Baron
Arthur Lutz
Failed
Edw. Ducholke
Christian Ducholke
Geo. Gitzel
Reta Gordon
Philip Goerz

To Grade 6
Honors
Manly Donaldson
Lydia Ulmer
Emma Armbruster
Walter Opperthauser
Margaret Miller
Philip Gebhardt
Elizabeth Hennig
Giles Clarke
Passed
Catherine Alt
Emelia Schutz
Henry Trapp
Lydia Zucht
Gwyne Davis
Ed. Ulmer
Lylia Staub
Gertie Grokenberger
Passed on Trial
Emelia Miller
Florence Zucht
Edw. Doll
Failed
Thomas Shreeves
Richard Rothe
Miss Olivia Regan.

To Grade 7
Honors
Lizzie Lutz
Geo. Eberhardt
Lorne Ontway
Mary Warner
Etta Staub
Passed
Herman Ducholke

To Grade 8
Honors
Jean McMillan
Alfred Miller
Lizzie Kulak
Eleanor Umbach
Queenie Donaldson
Passed
Frank Conture
May Williams
Recommended
Walter Ducholke
Failed
Valentine Kulak
Miss B. A. Lalonde Teacher.

To Grade 10
Anna Eberhardt
Amy Foerster
Sara McKinlay
Henry Klapper
Annie McKinlay
Mabel Carr
Raymond Shaul.

C. E. Clarke Teacher.

As pupils in Grades 8, 10, 11 have to write the Departmental Examinations it is impossible to give the results. Grade 8 results are published in the Edmonton papers the latter part of August while Grade 10 and 11 hear directly from the Department of Education.

C. E. Clarke Principal.

The Stony Plain Sun.

STONY PLAIN, ALTA.

Published at Stony Plain, Alta., every Thursday, at the office of The Sun, Third Street West.

THURS. AUG 10 1922

Measuring Electricity

Method Is Same As Used In Measuring Water

The language of the electrician is Greek to most people. While he talks glibly of volts and amperes and watts, they know only that they have to pay an electric light bill for so many units, and let it go at that!

Though electricity is not a fluid, most of its terms can be compared with water flowing through a pipe. Turn a stream of water onto the paddles of a water-wheel, the work that the wheel will do depends upon two things—the amount of water delivered every second and the pressure of the stream. The first is measured in gallons and the second in pounds.

In the case of electricity, however, the rate at which it flows is measured in amperes and its pressure in volts. The work which it will do is found by multiplying amperes and volts together, which gives the answer in watts, or units of energy.

The unit is 1000 watts, often called a kilowatt, which is the electrical equivalent of one horsepower.

You will find the number of watts they require engraved on most electric lamps, and from this you can discover what they will cost to use. A 25-watt lamp will use one unit of 1000 watts in forty hours' burning.

The ohm is another electrical instrument which can be understood by a comparison with water. Water flows easily through a large pipe, but if the pipe is narrow, only a small quantity can force its way through. What the pipe is to water, the wire is to electricity. The smaller the wire, the more difficult electricity will find it to pass, because the fine wire resists its flow. Wires are measured by their resistance in ohms.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Elephants never recover from pneumonia.

Sweden is a land of enlightenment; education is compulsory.

A Martial Obligation

"I must say those biscuits are fine!" exclaimed the young husband.

"However could you say those were fine biscuits?" whispered his mother as the fair bride went to get more from the kitchen.

"I didn't say they were fine, mother," replied the young man. "I merely said I must say so."

YOUR STARVED NERVES

The Cause of Neuralgia—Must be Treated Through the Blood

Neuralgia is the cry of the nerves for more and better blood. It means that the nerves are being starved Like every other part of the body the nerves are being starved. t fohs tafm nerves receive their nourishment through the blood. There is therefore no doubt that Dr. Williams' Pink Pills will prove beneficial even in extreme cases of neuralgia. These pills increase and enrich the blood supply, carrying to the nerves the elements they need, thus driving away the sharp, torturing pains which nearly drive the sufferer wild. The benefit given by Dr. Williams' Pink Pills in cases of this kind is shown by the case of Miss Carrie V. Fletcher, Ravenscliffe, Ont., who says:—"As the result of a severe wetting I got while out in a rain storm, I was attacked with neuralgia, from which I suffered greatly, and which kept me awake night after night. Although the pain diminished somewhat, I began to suffer in other ways. My appetite was poor; I got thin and had no energy. Indeed I was becoming a wreck of my former self. I was advised to try Dr. Williams' Pink Pills, and I am more than glad that I followed the advice, for they have restored me to my old-time strength. I cannot recommend the pills too highly and hope other persons in poor health will give them a fair trial."

You can get these pills through any dealer in medicine or by mail post-paid at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

At Alto, Crucero, in Bolivia, water freezes every night in the year, while at noonday the sun is sometimes hot enough to blister the flesh.

Minard's Liniment for Burns, etc.

Charles Baker, a British soldier, is still living unhampered although he has carried a bullet in his heart since the battle of Gallipoli.

THREE PIECE SUITS ARE VERY POPULAR

This trelaine three piece suit of heater and canton crepe has the slender lines so much desired at the present time. Tan wool is used in the embroidered motif, and the collar, which is very unique, is faced with crepe.

Mothers Value this Oil.—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Eclectric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Export Saskatchewan Butter

Between 25 and 30 Carloads Will be Sent to Britain this Year

A representative of the Saskatchewan Co-operative Creameries has just returned from Europe after having made arrangements to export the bulk of the company's butter from Regina to Great Britain direct, and it is expected that between 25 and 30 carloads will leave Regina for the British Isles this year. Four cars are already on their way to the Atlantic coast.

"COLD IN THE HEAD"

is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the System and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous surfaces of the System, thus reducing the inflammation and assisting Nature in restoring normal conditions.

All Druggists. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

Saskatchewan Coal Shipments

The coal mines of Bienfait, Sask., are maintaining weekly shipments in excess of 2,000 tons, fifty-six cars leaving the past week with 2,146 tons. At the five collieries there is a total of 165 men employed.

Asthma Can be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

The United States post office uses 800,000 miles of twine every year, enough to girdle the earth 30 times.

Minard's Liniment for Dandruff

Alcohol, it is predicted, will in a few years replace gasoline as fuel for motor-cars.

Irresistible Eyes are those which are bright and sparkling. Keep your eyes young and beautiful through the daily use of Murine. It has stood the test of time. At all druggists.

MURINE For Your EYES

Suffered So Her Hair Turned Gray

Husband of Winnipeg Woman Tells About Her Terrible Experience

"I never would have believed any medicine could bring about such a change as Tanlac has done in my wife," said Harry Gray, of 136 Bryce St., Winnipeg, Manitoba.

"For many years she suffered from stomach trouble and bilious attacks which, of late, were so violent that she had to go to bed for two or three days at a time. She got to be very thin and as weak as a child. She had such terrible headaches and suffered so dreadfully that though still a young woman, her hair turned gray.

"But the way Tanlac helped her is remarkable. She has gained fifteen pounds and is the picture of health. Tanlac is the finest medicine in the world."

Tanlac is sold by all good druggists.

To "Manufacture" Eggs

London's newest industry will be Sterilized Egg, Limited, a company which has just been granted a provincial charter for $100,000. It is headed by Dr. A. Roy Routledge and has secured the Canadian rights for manufacture or equipment which it is claimed will keep eggs fresh for two years.

Paring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

A Sure Sign

Editor.—Do you know how to run a newspaper?

Applicant.—No, sir.

Editor.—Well, I'll give you a trial. I guess you've had experience.

ECZEMA You are not experimenting, when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c. stamp for postage, etc. a box; all dealers or Edmanson, Bates & Co., Limited, Toronto.

Auto Accident Near Duffield.

On Thursday last, while four members of the Clements family of Duffield were on their way to spend the day at Seba Beach, their auto jumped the embankment about a mile from the Beach. The car was pretty badly smashed, and the occupants received injuries more or less serious. Dr Macarthur, who happened to be at Wabamun, was summoned, and gave first aid, after which the injured ones were removed to their homes.

N. E. Shorten

D. C., Ph. C.,

CHIROPRACTOR,

will be at Stony Plain Monday, Wednesday and Saturday Afternoon, till 4 o'clock. Consultations given. At Royal Hotel. Phone 18.

Spruce Grove.

A short time ago it was noised abroad that there was soon to be a game of baseball Married men vs. single men. Of course there were plenty of married men, But, to find nine of them who could play ball was considered by many to be out of the question. Councillor D Brox was one of those who thought differently, and he undertook the work of organisation with the result that on Tuesday evening his aggregation of Benedicts trimmed the single men by a score of 8 to 6.

Good humor prevailed thruout the game among the players and spectators. Mr Jake Brox was umpire, and there are some who say—but—er—your correspondent doesn't know the game very well, and, anyway, alls swell that ends swell.

Stony Plain and District

Another Popular Dance will be held in Ducholke's Hall, Friday evening. Edmonton Orchestra.

The usual movie pictures may not be shown on Saturday night, next.

Mr. Ducholke took a party of berry-pickers down to the river on Sunday.

Wheat cutting is now general in this district. In some few places the farmers are cutting their oats for hay.

Mr. Kelly is moving his household goods to day, from his residence on 2d St. to the quarters over the new store.

Edmonton Beach is the lively place these days, (and nights too), as 50 Edmonton youths, guests of the Rotary club, are visitors for two weeks at the Rotarians clubhouse which has just been completed.

Good progress is being made on the improvements to the Garden Valley School house, under contractor Gitzel. The new addition is being built to the south of the old structure, and the new entrance will be on the east side.

Messrs Neil Velden and Leslie Ray, from Windsor, Ont., were in Stony Plain district, looking for land.

Saturday next is Jasper Highway Day in Edmonton, and a big celebration including all kinds of races, will be held at the Exhibition Grounds.

Barnum and Bailey's stupendous aggregation of trained animals and ring performers are billed to appear at Edmonton on Monday next. Several of the local amateur entertainers are planning to attend, to get tips for next winter's show in Stony.

Four sons of Luke Smith, a farmer near Glidehurst, across the river, were burned to death one night last week when the barn in which they were sleeping, caught fire.

Edson's Agricultural Society, held its annual Fair on Tuesday, which proved quite successful.

Fort Saskatchewan, which has always run a very successful Fair, have decided to pass this year's up.

The Tofield Mercury does not issue this week, as Editor Bill Worton is attending the Short Course in Journalism at Winnipeg.

Holborn News.

When will wonders cease? Perhaps not until it rains.

Mr and Mrs F Kimmerley returned home from Edmonton the latter part of the week, accompanied by Mrs F G Schmidt, who spent a few days at the Kimmerley Ranch.

Hay-making is the order of the day.

Binders appear to be out-of-date at present—mowers taking their place.

Miss Jane Williams of Calgary is spending her holidays with her brother, Mr Fred Williams.

Mr and Mrs F Kimmerley were visitors to Stony on Tuesday.

The Friday dance at the Meisner barn was attended by the young folks from far and near. Some journeyed from Wabamun, Edmonton Beach, Graminia, Bright Bank and Stony. All had a good time, and were greatly pleased with the music dispensed by the Hewlett Orchestra, from Edmonton.

Mr F. G. Schmidt spent the week end at the Kimmerley ranch and returned to Edmonton on Monday, with Mrs Schmidt and family who have been spending a few holidays at the ranch.

Mr. W. J. Davidson is excavating and making other preparations for the building of his new house.
